Notes on hardware setup

1. Plug all power cables in (one for monitor, one for desktop)
2. Plug in Keyboard and Mouse into the two usb slots in the back of the computer.
3. Plug in PCI_USB into the SS-(USB symbol) slot above the two standard USB slots in the back of the computer and connect other end to monitor.
4. Plug in HDMI cable above that SS-USB slot, and connect other end to touchscreen monitor.
5. The “on button” is on the top right corner (glows white); for the touchscreen monitor it is the bottom right button (glows blue).
6. The password login is **DDI_K10SK** (all caps, numeric one and zero). Once prompted with the Windows App options, you can find a button to the desktop at the bottom left of the screen.

Running the DDI.exe app

1. Locate DDI.exe icon on bottom left taskbar.

2. Click the icon and the fullscreen DDI App will fill the field of view.
3. Move the mouse to the bottom right corner (out of view), and you can now disconnect both the keyboard and mouse.

Adjusting the volume

1. Press the Left hand side button labelled [1] on the bottom left of the touchscreen monitor.
2. Use the Up and Down buttons to get to “Audio Adjust”. Press [2] to confirm.
3. Press [2] to select any option, navigating with the Up and Down buttons.
4. After adjusting, press [1] to exit.

Exiting the DDI.exe app

1. Make sure the keyboard and mouse are attached.
2. Press “Control” + “Alt + “Delete” at the same time, then release when prompted with a menu.
3. Select “Task Manager”.
4. In the task manager window, select “DDI.exe” then click the “End Task” button in the bottom right corner to shut down the application.

Updating the DDI.exe software

1. Download the updated files from Dropbox here:
<https://www.dropbox.com/home/DDI%20-%20Client/Kiosk%20Files>
2. Once downloaded, drag the entire file to the desktop, then double click the app to run the updated version.
3. You can drag the newest version to the taskbar at the bottom left of the desktop screen for quick access.
4. Unpin the last version from there by right clicking the previous app icon and selecting “unpin this program from taskbar”.
